Index to Volume 60

The index to Volume 60 is composed of three parts: a subject index, an author index, and an advertising index.

The subject index is made up mainly of terms constructed by *International Pharmaceutical Abstracts* (*IPA*). The *IPA* index is an alphabetical, open-ended, controlled-vocabulary index that makes use of standardized headings. (The primary index terms for each article are listed routinely in *AJHP* as "index terms" after abstracts.) *IPA* covers all authored papers and editorials in *AJHP*, as well as selected letters and news reports. Items that were published in the ASHP Reports section, including official ASHP Statements and Guidelines, are indexed under "American Society of Health-System Pharmacists," as well as being covered by *IPA* in many cases. The subject index also notes all regular *AJHP* columns and, under the respective column headings, the titles of items in the following: Book Reviews, Editorials, Frontline Pharmacist, Letters, Management Consultation, News, and Q&A. The subject index also contains, under the heading "Correction Notices," the title and issue of publication of items for which corrections were printed, as well as the page numbers on which the corrections appear.
